

Project Name

Blood Bank Management System (BBMS)

Yea Project kya karega ?

Blood Bank Management System

Ye ek website hogi jiska purpose **blood donors aur blood ki zarurat wale patients ko connect karna** hai aur blood stock ko digitally manage karna hai.

Isme kya hoga?

Donor

- Register/Login karega
- Apni details aur blood group add karega
- Blood donate karega
- Apni donation history dekhega

Patient

- Blood group search karega
- Blood availability dekhega
- Blood request bhejega
- Request status check karega

Hospital

- Blood request receive karega
- Blood issue karega
- Blood stock update karega

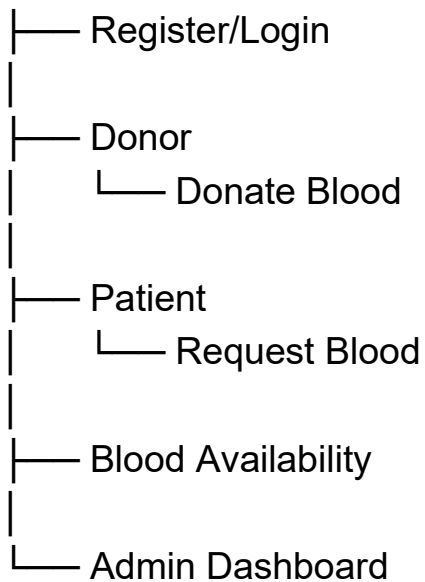

Admin

- Sab users manage karega
- Donors manage karega
- Blood inventory manage karega
- Blood requests approve/reject karega
- Hospital data manage karega
- Dashboard me reports dekhega

Website Flow

Hamara Goal

Ek **professional Blood Bank Management Website** banana jisme:

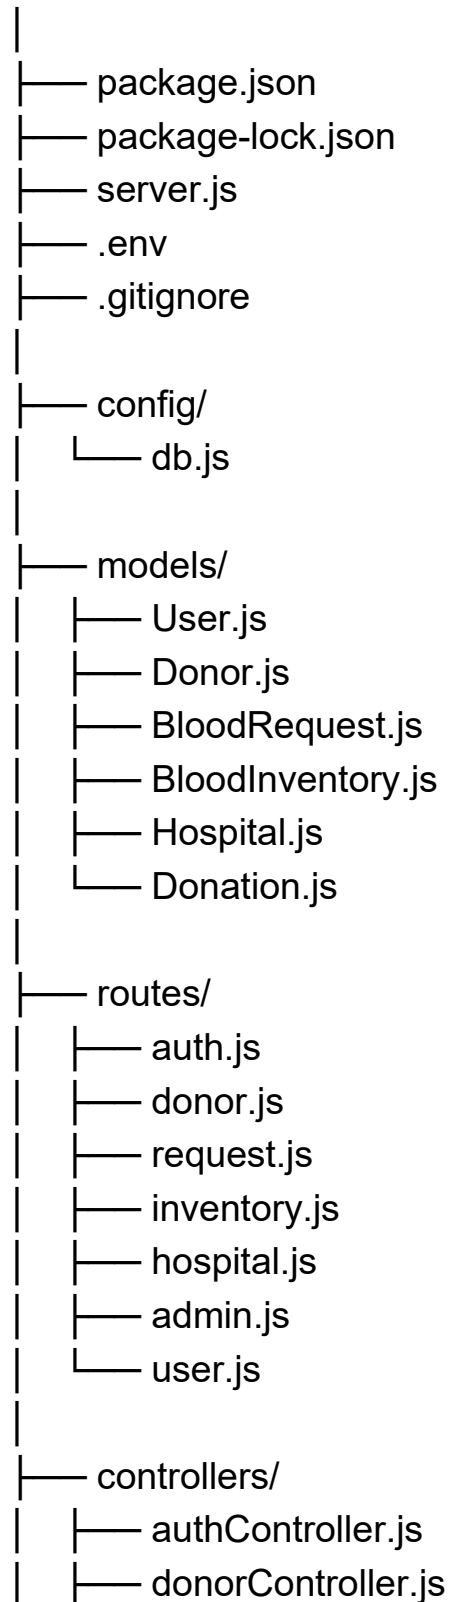

- ☒ Login System
- ☒ Donor Registration
- ☒ Blood Request
- ☒ Blood Inventory
- ☒ Admin Panel
- ☒ MongoDB Database
- ☒ Complete Software Engineering Documentation (SRS, SDLC, UML, DFD, ER Diagram, etc.)

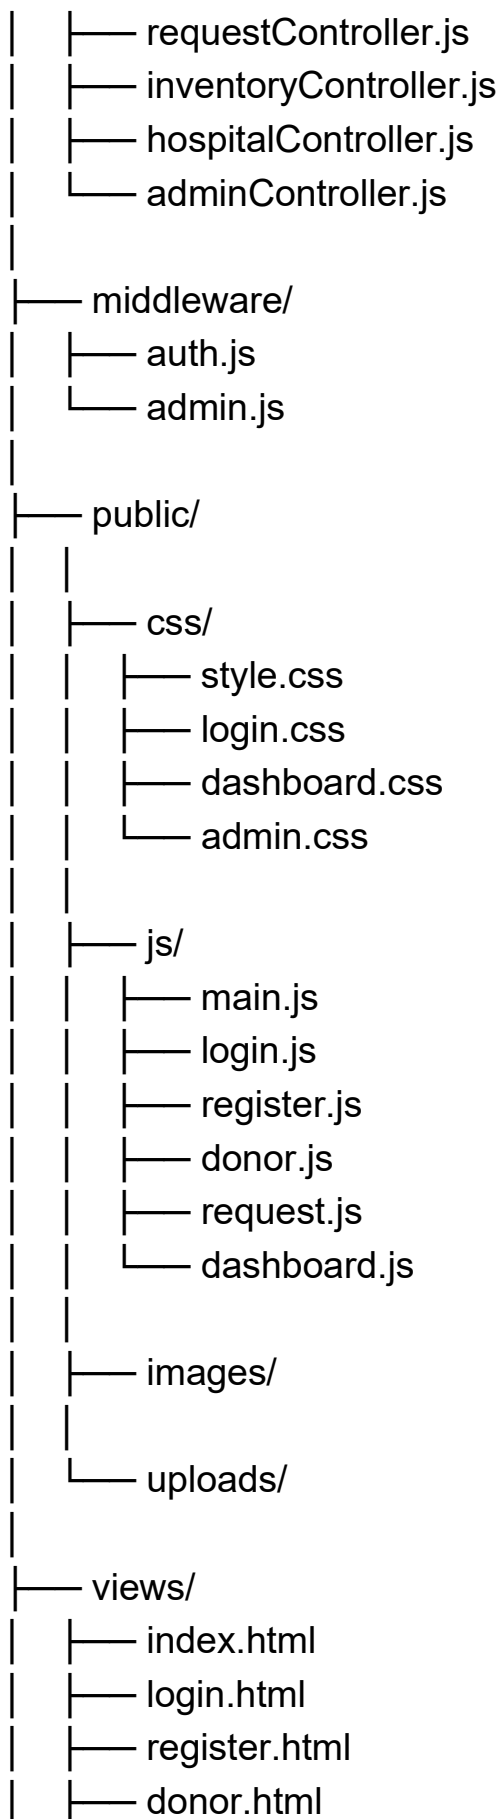

Technology Stack (Locked)

Component	Technology
Frontend	HTML5
Styling	CSS3
Client-side	JavaScript
Backend	Node.js
Framework	Express.js
Database	MongoDB
Database Tool	MongoDB Compass
ODM	Mongoose
Version Control	Git + GitHub (later)
IDE	VS Code

Recommended Folder Structure

Blood-Bank-Management-System/

```
| |— blood-request.html
| |— blood-availability.html
| |— hospitals.html
| |— dashboard.html
| |— admin-login.html
| |— admin-dashboard.html
|
|— README.md
```

MongoDB Collections

users

donors

bloodrequests

bloodinventories

donations

hospitals

User Roles

Visitor

- Home
 - Search Blood
 - View Hospitals
 - Contact
-

Donor

- Register
- Login
- Donate Blood

- View Donation History
- Update Profile

3 Patient / Recipient

- Search Blood
- Request Blood
- Track Request

4 Admin

- Dashboard
- Manage Users
- Manage Donors
- Manage Blood Stock
- Approve Requests
- Manage Hospitals

Database Relationship

Development Plan

Phase 1 (Software Engineering)

- ☒ Practical 1
- ☒ Practical 2
- ☒ Practical 3

Phase 2

- SRS Document

Phase 3

- SDLC
-

Phase 4

- UML Diagrams
-

Phase 5

- DFD
 - ER Diagram
-

Phase 6

- UI Design
-

Phase 7

- Frontend Development
-

Phase 8

- Backend Development
-

Phase 9

- MongoDB Integration
-

Phase 10

- Testing
-

Phase 11

- Final Documentation
-

Project Rules (Lock)

Ye rules hum project ke end tak follow karenge:

-  HTML + CSS + JavaScript frontend
-  Node.js + Express backend
-  MongoDB + Mongoose database

-  MVC folder structure
-  Professional coding standards
-  GitHub-ready project structure
-  Har phase ke baad testing
-  Software Engineering documentation aur implementation dono saath-saath

Is approach se documentation aur coding parallel chalenge, isliye semester ke end me report aur working project dono ready honge.
